DETAILED ACTION

1. Applicant's election with traverse of Group II, claims 9-10, in the reply filed on 08 November 2004 is acknowledged. The traversal is on the ground(s) that the inventive groups shared similar or same classifications, and that some groups at least partially overlapped. This is not found persuasive in part and is persuasive in part because although the inventive groups for the multiplicity of structurally and functionally different amino acid sequences are within the same classification does not remedy the fact that the products of the different inventive groups require individual searches that do not necessarily, if at all, include any aspects of searches for the other inventive groups. For that reason, the search is burdensome. However, Applicants argument that there is some overlap between the elected invention and aspects of other inventive groups was found persuasive. Thus, claims 11, 12, 14, 39-40, 42-49 and 51-52 are joined in part with the elected invention of Group II, claims 9-10, only in so far as the claims pertain to the elected species, i.e., SEQ ID NO: 163. Applicants are reminded that along with the restriction, an election of species was also requested. Applicants complied with the election of species and elected the species SEQ ID NO: 163. In accordance with Markush practice, a search of the Markush-type claim was extended for claims 9-10. The MPEP 803.02 states should no prior art be found that anticipates or renders obvious the elected species, the search of the Markush-type claim will be extended. If prior art is then found that anticipates or renders obvious the Markush-type claim with respect to a non-elected species, the Markush-type claim shall be rejected and claims to the non-elected species held withdrawn from further consideration. The prior art search, however, will not be extended unnecessarily to cover all non-elected species. In the instant Application, a search of the Markush-group was extended. Those Markush claims not

Application/Control Number: 09/932,322

Art Unit: 1654

drawn to the elected invention are held withdrawn from further consideration as being drawn to non-elected species.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 3. Claims 9-11 are rejected under 35 U.S.C. 102(a) as being anticipated by Sauge-Merle et al. (European Journal of Biochemistry, 1999, Vol. 266, pages 62-69). Sauge-Merle et al. teaches sequences that read on the sequence formulae of SEQ ID NO: 10. For example, see page Figure 1, page 64, for the amino acid sequence of A. thaliana.
- 4. Claims 9-11 are rejected under 35 U.S.C. 102(e) as being anticipated by Victoria *et al.* (US 6,207,160 B1). Victoria *et al.* teaches sequences and subsequences of the instantly claimed generic formulae SEQ ID NO: 10. For example, in Table 1, column 16, Victoria *et al.* teaches SEQ ID NOs: 27 and 32-35.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1654

6. Claims 11-12 and 14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 11 and 12 are rejected for the indefinite recitation of different sequences for SEQ ID NO: 3 in each claim. Claim 12 appears to have one more X residue assigned between the cysteine residues, thus, it is unclear as which SEQ ID NO: 3 is intended.

Claim 14 is rejected for the indefinite recitation of a "J" residue SEQ ID NO: 164.

Claim Objections

7. Claims 9, 39-40, 42-49 and 51-52 are objected to because of the following informalities:
(a) claim 9 is objected to for spelling the term formula as "formulae", however, the term is spelled "formula" through out the remaining claims; (b) claims 39-40, 42-49 and 51-52 are objected to for depending from rejected claims. Appropriate correction is required.

Conclusion

8. The elected species of (a) SEQ ID NO: 163, (b) the general formula H in the context of claim 9, and (c) the general formula A of claim 11 in the context of claim 11, are free of the prior art. Claims 1-8, 13, 24-38, 41, 50 and 53-56 are withdrawn from consideration as being drawn to non-elected subject matter.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to B. Dell Chism, whose telephone number is (571) 272-0962. The examiner can normally be reached on M-F 08:30 AM - 5:00 PM. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Bruce Campell, PhD can be reached on (571) 272-0974.
